Conference papers

The 2020 NZSEE Annual Technical Conference was originally scheduled to be held at the Museum of New Zealand Te Papa Tongarewa, in April 2020. However, due to the global Covid-19 pandemic and the resulting national lockdown in Aotearoa New Zealand, the physical conference was cancelled. In place of the conference, the **NZSEE 2020 Webinar Series** included six webinars and ran from April 22nd to July 8th, 2020. Many of the keynote and invited plenary sessions originally planned for the conference, along with a subset of submitted conference papers, were presented within the webinar series. To acknowledge the significant investment of time and effort, from the conference committee, submitting authors, and from the peer reviewers, NZSEE still produced this proceedings of conference papers. All papers underwent the full peer review process, and this proceedings serves as a record of the papers that would have been presented, had the physical conference been able to proceed.

We thank everyone for their patience and support in producing both the NZSEE 2020 Webinar Series and this conference proceedings, as we sought to make the most of these challenging circumstances.

Geoff Rodgers and Rajesh Dhakal (NZSEE 2020 Convenors) and the NZSEE Management Committee

NZSEE would like to acknowledge our appreciation of EQC as our conference/webinar series partner, as well as key sponsor MBIE Building Performance, and other webinar series sponsors.
